SMART HOME AUTOMATION

AI-Powered Smart Home

Rahma · Gehad · Asmaa · Mohamed · Rana · Mazen

Ever Left Home With Doubts?

What if your home could take care of all these things for you?

Less worry.
More comfort.
Better control.

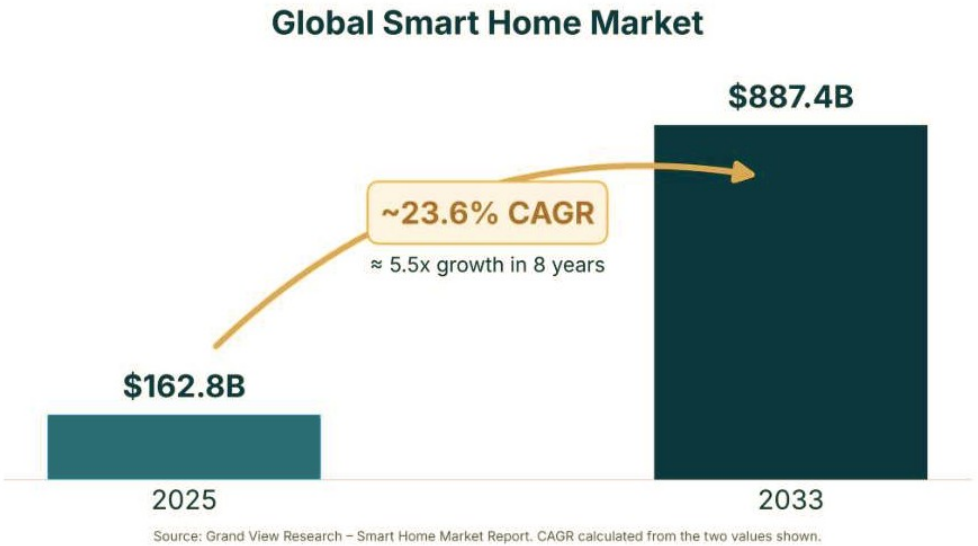

What Is a Smart Home?

A connected living environment where devices communicate and work together to provide automation, monitoring, and centralized control.

- **Automation**
- **Monitoring**
- **Centralized control**

A Rapidly Growing Global Market

OUR PROJECT VISION

To transform everyday living into a smarter, safer, and more comfortable experience.

Problem Statement: Five Everyday Challenges

01

Security & Safety Concerns

People worry about their home when they are away.

02

Energy Inefficiency

Lights or air conditioning may stay on.

03

Lack of Convenience & Control

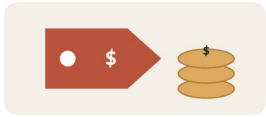

Separate devices are difficult to manage.

04

Cost Worries

Fear that smart home systems are too expensive.

05

Hard to Adapt (Tech Fear)

Fear that the technology is too complex to use.

Market Research: What Do Customers Value?

41%

chose saving money as a preferred outcome

37%

chose safety and security

19%

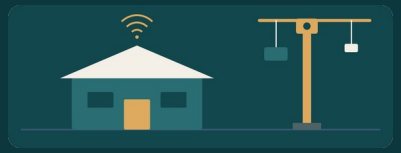

chose convenience and time savings

Source: ASHB / Harbor Research, 2024 – survey of 760 consumers

Target Audience

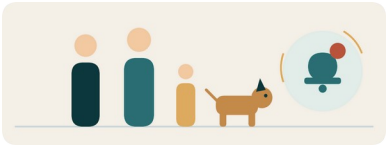

Primary Audience:

People planning or building a new home

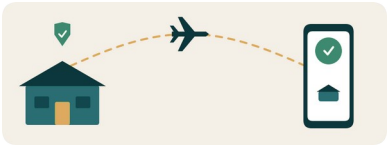

Families with Children or Pets:

Need safety alerts and monitoring

People Who Travel Often:

Need remote access and peace of mind

Customer Needs: What Our Solution Must Deliver

Peace of Mind:

Real-time alerts and 24/7 monitoring

One Simple App:

Control the whole home from one place

Lower Bills:

Our goal: cut energy use by 30%

Safe Family:

Child and pet safety alerts

Our AI-Powered Smart Home Solution

Our Solution

- An integrated smart home system.
- AI-powered automation.
- Centralized control through a mobile application.
- Smart lighting, security, and climate control.
- Voice commands and remote access.

Why Choose Our Solution?

Value Proposition

Convenience:

Easy control from anywhere.

Security:

Better home monitoring and protection.

Energy Efficiency:

Reduce unnecessary energy consumption.

Time Saving:

Automate daily activities.

Smart Living:

A more comfortable lifestyle.

Smart Lighting

Smart Lighting System

Automatic Control:
Lights turn on/off based on room occupancy.

Brightness Adjustment:
Control light intensity according to your needs.

Lighting Scenes:
Different settings for studying, relaxing, and entertainment.

Energy Saving:
Reduce unnecessary electricity consumption.

Remember: Automatic – Brightness – Scenes – Energy Saving

Voice Control

Example:

“Turn on the living room lights.”

- **Hands-Free Operation:** Control devices using voice commands.
- **Simple Commands:** Turn lights on/off or adjust temperature.
- **Easy Interaction:** No need to open the mobile application.
- **Convenience:** Faster control, especially when your hands are busy.

Smart Security

- **Smart Door Locks:** Control and monitor door access.
- **Motion Sensors:** Detect unexpected movements.
- **Security Cameras:** Monitor your home remotely.
- **Instant Notifications:** Receive alerts about suspicious activity.
- **Remote Monitoring:** Check your home from anywhere.

Remember:

Detect – Monitor – Alert – Protect

Smart Climate Control

Temperature Management:
Adjust room temperature remotely.

Automatic Control:
Manage cooling based on user preferences.

Remote Access:
Prepare your home before arriving.

Energy Efficiency:
Avoid unnecessary cooling when nobody is home.

22°C

Example:

Set the temperature to 22°C before arriving home.

One Application – Complete Control

Mobile Application

Centralized Control: Manage all connected devices from one place.

Lighting Management: Turn lights on/off and adjust brightness.

Climate Management: Control air conditioning and temperature.

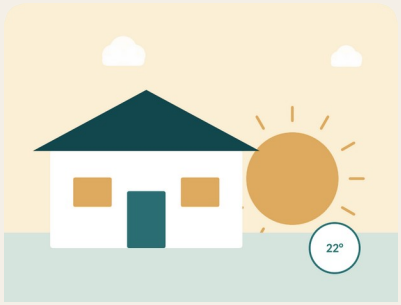

Security Monitoring: Check cameras and sensors.

Instant Notifications: Stay updated about your home.

Remote Access: Control your home from anywhere.

Key message One application instead of multiple applications for different devices.

A Day in a Smart Home

MORNING

Lights turn on

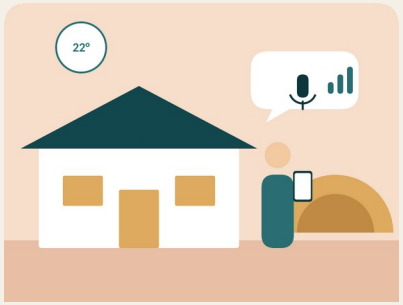

Lighting and climate are ready before you wake up.

DAYTIME

Away from home

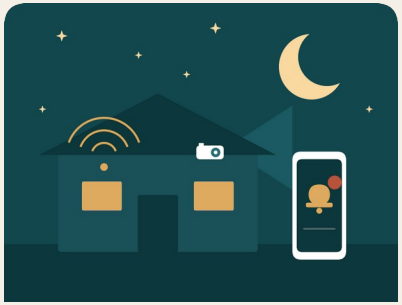

Doors locked, cameras watching, nothing wasting energy.

EVENING

Welcome home

Already 22°C. Control lights by voice or from the app.

NIGHT

Safe all night

Motion sensors detect movement and alert your phone.

Competitor Analysis: Market Overview

The smart home market is growing as customers look for convenient, secure, energy-efficient and automated homes.

OUR INTEGRATED SMART HOME SYSTEM COMBINES

- **Smart Lighting**
- **Smart Security**
- **Climate Control**
- **Mobile Application**
- **Voice Control**
- **Centralized System Integration**

Target market Individuals and families looking for affordable, convenient and secure smart home solutions.

Direct & Indirect Competitors

1. Direct Competitors

Provide smart home automation systems and integrated solutions.

- **Aura Smart Home:** Smart locks, lighting, climate control, wireless and KNX automation.
- **Vento Smart:** Integrated lighting, security, climate, networking and automation.
- **Teknetic Egypt:** Home automation, lighting, cameras, locks and climate control.
- **Yala:** Home and business automation, security and climate control.

2. Indirect Competitors

Alternatives customers may choose instead of a complete system.

- **SONOFF:** Affordable individual smart switches, sensors and lighting controllers.
- **Tuya Smart:** Smart devices controlled through mobile applications.
- **Xiaomi Smart Home:** Individual smart cameras, sensors and automation products.
- **Traditional Security Providers:** Standalone CCTV, alarms and conventional security systems.

Our Competitive Advantage

“One Smart Home. One Connected System. Complete Control.”

01
All-in-One Solution
Lighting, security, climate control and voice commands in one system.

02
Cost-Effective Design
Essential smart home features at a competitive price.

03
Centralized Control
All connected devices managed through one mobile app.

04
Flexible Customization
Choose the features you need and expand later.

05
Security & Privacy
Cybersecurity built into the system architecture.

06
Local Technical Support
Installation help, maintenance and customer support.

Main differentiation: smart home technology that is more accessible without sacrificing integration, usability or security.

Marketing & Distribution Channels

Building awareness, demonstrating value, reaching customers

- **Social Media:** Facebook, Instagram, TikTok and promo videos
- **Website:** Product info, features, pricing, online inquiries
- **Demonstrations:** Live demos and smart home prototypes
- **Real Estate Partnerships:** Property developers and contractors
- **Electronics Retailers:** Smart device and electronics stores
- **Direct Sales:** Homeowners and businesses
- **Referral Marketing:** Satisfied customers recommend the system

Distribution Strategy

- Direct online sales.
- Installation through our technical team.
- Partnerships with electronics suppliers.
- Collaboration with real estate developers and interior designers.

How Will We Make Money?

Business Model & Revenue Streams

Business Model:

- B2C – Selling directly to homeowners.
- Installation and customization services.
- Subscription-based services.

Revenue Streams:

- Smart devices and hardware sales.
- Installation fees.
- Monthly or yearly subscriptions.
- Maintenance and technical support.
- Additional smart home features.
