OUR MISSION

Intelligence, built into every wall.

> *To build an intelligent, secure, and energy-efficient smart home by integrating advanced automation and smart technologies directly into the home's infrastructure during construction, ensuring comfort, safety, and seamless control.*

Every iHome is planned on the blueprint: smart conduits, sensors and the iHome hub are part of the structure, not added later.

Built in, not added on
Wiring, sensors and controllers are designed into the home during construction.

Intelligent
AI-powered routines and voice control that adapt to the way you live.

Safe & secure
24/7 monitoring, smart locks and real-time alerts protect your family.

Energy-efficient
Smart lighting and climate control designed to cut energy use by 30%.

OUR VISION

The future of living, connected.

> *To become a model for future-ready smart living by creating a **fully connected, sustainable, and expandable home** that enhances everyday life through intelligent technology, automation, and peace of mind.*

Connected
Every device talks to every other through one secure network.

Sustainable
Less wasted energy through automation and smart monitoring.

Expandable
Ready for 5+ new smart devices without structural changes.

What we stand for

- Innovation
- Safety & Security
- Sustainability
- Comfort & Convenience
- Reliability
- Integration
- Scalability
- Privacy & Cybersecurity
- Peace of Mind
- Quality & Excellence

A LOOK INSIDE

Step inside a home that thinks ahead.

From the curtains to the front door, every room works as one system. Here is an evening in an iHome living room.

1 Smart Lighting
Scenes, schedules and occupancy-based dimming that follow natural light.

2 Smart Curtains
Motorised curtains open with the morning and close for privacy at night.

3 Climate Control
Thermostat and A/C adjust automatically: comfort with less energy.

4 Voice Assistant
“Hey iHome, movie mode.” Control the whole home hands-free.

5 Home Dashboard
Lights, climate, security and energy at a glance on your screen.

6 Smart Cameras
24/7 monitoring with real-time alerts. Keep an eye on kids and pets.

7 Smart Lock
Keyless entry by PIN or phone, with an alert on every unlock.

8 Motion & Safety Sensors
Detect movement and trigger lights, alarms or notifications.

9 The iHome App
Every system in one app, at home or anywhere in the world.

A DAY IN AN IHOME

6:30 AM
Curtains open, lights warm up.

8:00 AM
Doors lock, A/C switches to eco.

6:00 PM
Your evening scene is ready.

11:00 PM
Lights off, alarm armed.

WHY CHOOSE IHOME

Why iHome?

30%	<2s	24/7	1
Energy savings target	Command response time	Security monitoring	App for the whole home

Built in from day one
Installed during construction: hidden wiring, clean walls and no costly retrofitting later.

One app, total control
Lighting, climate, curtains, security and voice, all managed from a single app.

Lower energy bills
Intelligent automation and monitoring are designed to cut energy use by at least 30%.

Security that never sleeps
Smart cameras, motion sensors, smart locks and instant alerts, plus child and pet monitoring.

Privacy by design
Strong authentication, encryption and a segmented network keep your family's data private.

Future-ready
Expandable infrastructure supports 5+ additional devices without structural changes.

Our competitive edge

	IHOME	TYPICAL ADD-ON GADGETS
Integrated into the home during construction	✓	× Added after move-in
One app for every system	✓	× A separate app per brand
AI routines and voice control	✓	× Basic timers
Encrypted, segmented home network	✓	× Varies by device
Expandable without rewiring	✓	× Often needs new wiring
Tested end-to-end before handover	✓	× Do-it-yourself setup

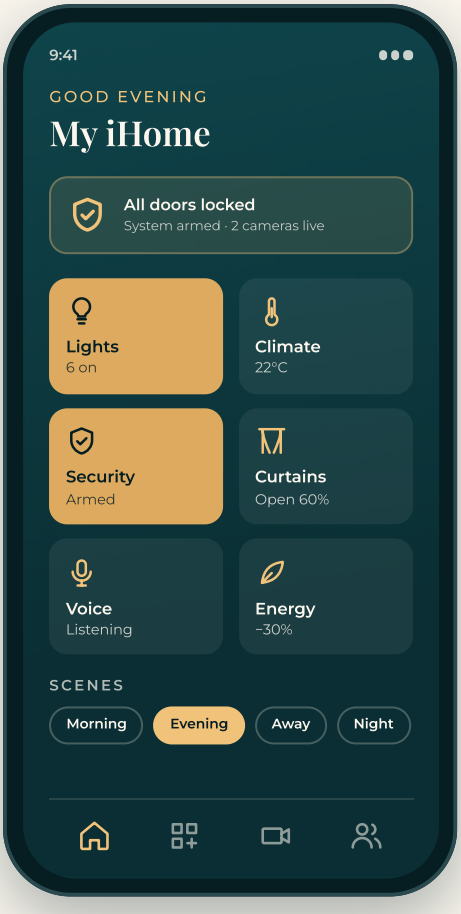

Building a new home?

Let's plan your smart home on the blueprint, before the walls go up.

ONE APP · TOTAL CONTROL

Your whole home, in your pocket.

Smart Lighting
Remote control, schedules and occupancy-based lighting.

Climate Control
Monitors indoor conditions and adjusts A/C and heating.

Security System
Cameras, motion detectors, smart locks and live alerts.

Voice Control
Run home functions and devices with simple voice commands.

Mobile App
Monitor and control every system from one platform.

Choose your package

Essential
100–150 M²

$5,000 – $7,000

- Smart lighting & climate control
- Voice commands
- Basic security & safety sensors
- Mobile app control

MOST POPULAR

Plus
150–220 M²

$7,000 – $11,000

- Advanced lighting, curtain & temperature automation
- Smart cameras
- Child & pet monitoring
- Full remote control

Premium
220–300 M²

$11,000 – $15,000

- Full home automation with AI routines
- Smart entertainment
- Advanced multi-room security
- Intelligent energy management

Prices depend on house size and the level of automation. Every package includes installation during construction, testing and handover.

THE PEOPLE BEHIND IHOME

Meet the team.

Six engineers covering software, hardware, security, networking and business, working as one team to turn your dream home into reality.

MA

Eng. Mazen Adel

PROJECT MANAGER

Planning, coordination and progress tracking

MA

Eng. Mohamed Ayman

SOFTWARE & TESTING

Mobile application, testing and bug fixing

RM

Eng. Rahma Mohammed

BUSINESS DEVELOPMENT

Suppliers, procurement and documentation

RS

Eng. Rana Saber

HARDWARE & SYSTEM ARCHITECTURE

Smart lighting, climate control and installation

GM

Eng. Gehad Mohammed

SECURITY ENGINEER

Smart security, risk assessment and cybersecurity

AK

Eng. Asmaa Khaled

NETWORK & IOT

Network design, device connectivity and voice control
