Technical Manager

Slide 8 • What we will build

Thank you. I'm [Name], the Technical Manager.

Think of a traffic light that knows the road is empty and turns green for you. That's the kind of city we're building.

We will install sensors, smart cameras, and smart traffic lights, use solar energy, and connect everything through one control center and a city app.

➡️ **But to build all this, we need the right resources.**

Slide 9 • Our five resources

We need five types: people, around 186 in the infrastructure phase, materials like cables, equipment like cameras, money, and time.

➡️ **So, how much does all this cost? Our Finance Manager, [Name], will tell you.**

Stakeholder Manager

Slide 14 • Stakeholders

Thank you. I'm [Name], the Stakeholder Manager.

We can build the smartest city in the world, but if people don't use it, it fails.

We work with the government, investors, tech companies, contractors, and utilities. But the most important are the citizens, people like Ahmed.

➡️ **And to keep all these people on board, we need good communication.**

Slide 15 • Communication

The team meets every week and contractors every two weeks; the sponsor, investors, and citizens get monthly updates, and any serious problem reaches the sponsor within 24 hours.

➡️ **So, what does all this mean for Ahmed?**

Slide 16 • Thank you

With Roaya, his Monday becomes a lot easier.
